

KARTHIK I

GenAI Developer

Innovative GenAI Developer with experience in designing, deploying, and troubleshooting AI-driven solutions for enterprise learning platforms. Skilled in building RAG-based retrieval systems and integrating Large Language Models (LLMs) to deliver intelligent, scalable applications. Proficient in AWS infrastructure management, Terraform scripting, API debugging, and OpenSearch integration. Adept at creating reproducible workflows, modular automation pipelines, and cloud-native solutions that enhance efficiency and reliability.

karthikiyappanofl@gmail.com +91 - 9360460812 Coimbatore –Tamil Nadu, India [linkedin.com/in/i-karthik/](https://www.linkedin.com/in/i-karthik/)

SKILLS

- **Cloud & AWS:** Lambda, Cognito, S3, Step Functions, IAM, Terraform
- **Programming:** Python, Shell scripting, SQL
- **AI & GenAI:** Multi-agent systems, Prompt engineering, RAG architectures
- **Testing & CI/CD:** Python unit test, coverage analysis, GitHub Actions
- **Tools:** Postman, Git, VS Code, Visual Studio, MSSQL

EXPERIENCE

GenAI Developer – SkillSpring - Cognizant Platform Engineering, Cognizant June 2025 – Present

- Driving the design and deployment of AI agents to automate transcript processing and enterprise learning workflows, improving scalability and efficiency across platforms.
- Managing AWS services including Lambda handlers, Cognito authentication, S3 storage, and Step Functions to orchestrate secure, event-driven automation pipelines.
- Building reproducible infrastructure deployments using Terraform, with robust IAM policy design to ensure compliance and security in cloud environments.
- Developing Python unit test suites integrated with CI/CD pipelines, enabling automated coverage analysis and ensuring reliability of multi-agent systems.
- Collaborating with cross-functional teams to document workflows, validate OpenSearch queries, and align technical deliverables with enterprise learning goals.
- Implementing structured debugging and validation processes to streamline error handling, schema updates, and reproducibility in cloud-native deployments.

Achievement Highlight

- Officially recognized by Cognizant Platform Engineering for *outstanding dedication, eagerness to learn, and contributions to Terraform scripting, codebase exploration, and seamless team collaboration.*

EDUCATION

BE in Mechanical Engineering - SNS College of Engineering, Coimbatore (2021 – 2025)	82.8%
HSC - Corporation Hrs Sec School, Rathinapuri, Coimbatore(2020-2021)	81.1%
SSLC - S.B.K.V Hrs Sec School, R.S.Puram, Coimbatore(2018-2019)	66.6%

KEY ACHIEVEMENTS

- Worked on **AI agent development** for transcript processing and enterprise learning automation.
- Successfully deployed **AWS Lambda + OpenSearch integrations**, improving scalability and error handling.
- Built **Terraform pipelines with secure IAM policies**, ensuring reproducibility and compliance.
